

ELSEVIER

---

- Elsevier is a Dutch information and analytics company and one of the world's major providers of scientific, technical, and medical information
- The electronic database of Elsevier makes available to scientists not only the short annotations of scientific literature published throughout the world but also full versions of the work
- Elsevier makes it possible to find quotations and other bibliometric information. Only two companies have such big electronic databases and one of them is Elsevier.

For using of the electronic databases, please register with the relevant e-mail in the relevant registration field. **Bases can only be accessed from university campuses.**

It was established in 1880 as a publishing company.  
Its products include journals such as “The Lancet and Cell”, the “ScienceDirect”, collection of electronic journals, the series of journals, the online citation database “Scopus”, and the “ClinicalKey” solution for clinicians.

# ScienceDirect

- It was launched in March 1997. It hosts over 12 million pieces of content from 3,500 academic journals and 34,000 e-books.
- The journals are grouped into four main sections: *Physical Sciences and Engineering, Life Sciences, Health Sciences, and Social Sciences and Humanities*.
- Article abstracts are freely available, but access to their full texts (in PDF and, for newer publications, also HTML) generally requires a subscription pay-per-view purchase.

"ScienceDirect" can be used by anyone, but it is desirable to register on the site to access more resources and tools

Here you can find the desired material according to the author, title or volume

The screenshot shows the ScienceDirect website homepage. At the top, the ScienceDirect logo is on the left, and "Journals & Books" is on the right. In the top right corner, there are two buttons: "Create account" and "Sign in". Below the logo, a search bar is present with the text "Search for peer-reviewed journals, articles, book chapters and open access content." The search bar has several input fields: "Keywords", "Author name", "Journal/book title", "Volume", "Issue", and "Pages". To the right of these fields is a magnifying glass icon and the text "Advanced search". Below the search bar, there is a dark blue section with the heading "Discover more with ScienceDirect". Under this heading, there are three items: "Receive personalized recommendations based on your recent signed-in activity", "View your reading history", and "Create publication and search alerts". Below these items is a blue button that says "Register for personalized features >". At the bottom of the page, there is a white section with the heading "Explore scientific, technical, and medical research on ScienceDirect". Below this heading, there are four links: "Physical Sciences and Engineering", "Life Sciences", "Health Sciences", and "Social Sciences and Humanities".

Annotations on the screenshot:

- A red arrow points from the text "Here you can find the desired material according to the author, title or volume" to the "Keywords" input field in the search bar.
- A red arrow points from the text "here you can register" to the "Create account" button in the top right corner.

## Highlights

- Cancer control science is essential for improving cancer outcomes.
- A pioneering cancer control effort was created by the 1971 National Cancer Act.
- This paper traces the evolution of U.S. NCI's cancer control efforts.
- This story provides guidance to cancer control efforts globally.

## Abstract

Throughout the global community, cancer control has been recognized as an important component of cancer care for populations, patients and their families.

Throughout the global community, cancer control has been recognized as an important component of cancer care for populations, patients and their families.
